The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status					
1)⊠ Responsive to communication(s) filed on <u>06/22</u>	2/09 (an amendment/response).

DETAILED ACTION

Response to Amendment

1. The amendment filed on 06/22/09 has been made of record and entered. Claim 1 has been amended. Claims 2-6 have been canceled. Claims 14-18 have been added.

Claims 1 & 7-18 are currently pending in this application.

Specification

2. The examiner has not checked the specification to the extent necessary to determine the presence of **all** possible minor errors (grammatical, typographical, and idiomatic). Cooperation of the applicant(s) is requested in correcting any errors of which applicant(s) may become aware of in the specification, in the claims and in any further amendment(s) that applicant(s) may file.

Applicant(s) is also requested to complete the status of the copending applications referred to in the specification by their Attorney Docket Number or Application Serial Number, if any.

The status of the parent application(s) and/or any other application(s) cross-referenced to this application, **if any**, should be updated in a timely manner.

3. The subject matter of claim 6 was previously indicated allowable; however, upon carefully reviewed of the applied prior art to US Pat. 6,730,800 B2, it has now been withdrawn. A new ground of rejection follows.

Art Unit: 1793

Claim Rejections - 35 USC § 102(e)/103

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 7, & 12-18 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Fischer et al., hereinafter referred to as "Fischer '800", (US Pat. 6,730,800 B2).

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Fischer '800 discloses a catalyst comprising <80% by weight of CuO and >20% by weight of an oxidic support, etc. (see col.13, claim 1). The oxidic support is Al_2O_3 or a combination of Al_2O_3/ZnO in a weight ratio of from 20:1 to 1:20 (see col. 13, claim 4). The

Art Unit: 1793

catalyst further comprises one or more metals or compounds thereof selected from the group consisting of ZrO_2 , TiO_2 , SiO_2 and Mg (see col. 14, claims 10 & 11). The shaped catalyst body has a pore volume of ≥ 0.01 ml/g for pore diameter of >50 nm (see col. 14, claim 14). The ratio of macropores having a diameter of >50 nm to the total pore volume for pores having a diameter of >4 nm in the shaped catalyst body is >10% (see col. 14, claim 15). See entire reference for further details.

The limitation on "the oxidic support material...and is predominantly present as X-ray-amorphous material" in the instant claim 1 is noted. Since the disclosed oxidic support is the same as the claimed oxidic support, it is only reasonable to conclude that it is inherent that it would also be in the amorphous form as well.

The applied reference has common inventors with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Response to Applicants' Arguments

5. Applicants' remarks filed on 06/22/09 have been carefully reconsidered, but not deemed persuasive in view of the new ground of rejection(s) and/or objection(s) above.

Art Unit: 1793

Conclusion

6. Claims 1 & 7-18 are pending. Claims 1, 7, & 12-18 are rejected. Claims 8-11 are withdrawn due to nonelected (distinct) invention(s). No claims are allowed.

Contacts

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Primary Examiner CAM N. NGUYEN, whose telephone number is 571-272-1357. The examiner can normally be reached on M-F, 9:00 AM - 6:30 PM, at alternative work site.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley Silverman, can be reached on 571-272-1358. The fax phone number for the organization where this application or proceeding is assigned is 571-272-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
